

Around The Town

Rev. T. H. Doud is taking a vacation on the coast.

Joe Senz has been very ill the past week.

Howard Smith returned this morning from his vacation.

Byron Duncan was a Kingman visitor the past week.

Jimmie Clark drove in from Seligman Monday.

Mrs. T. L. Cornwall is spending the week in town.

Ray Robinson drove to the coast Sunday evening.

Mrs. W. E. Frost spent a few days in town the past week.

Mr. and Mrs. Ned Robinson are spending a two weeks vacation in the northern part of the state.

F. E. Kelly of the Beale Barber shop returned Tuesday evening from a two weeks vacation.

George Musser returned Wednesday from the Grand Canyon, where he has spent the past two months.

C. A. Warren dislocated his wrist the first of the week while in swimming at the McCoy ranch.

Louis Banegas from below the Sandy was a Kingman visitor the first of the week.

W. K. Ridenour was in Kingman Tuesday for the meeting of the board of supervisors.

George B. Ayers has been called to Eagle Rock City, California, on account of the illness of his wife.

P. S. Virgin and J. R. Livingston of Chloride were Kingman visitors this week.

Mr. and Mrs. Carl G. Krook are out at Billy Klotz's camp for a few days. They will be home Sunday.

A ten pound baby boy was born to Mrs. N. H. Chaplain of Hackberry on the 14th.

Mrs. Frank Van Marter and children will return from their vacation this evening.

Ora Gruninger the local contractor is installing the ovens and fixtures for the new home of the Home Bakery in the Armour building.

Mr. and Mrs. Roy Robinson and Miss Lillian Kause will return from a vacation spent at Coronado Saturday evening.

Mrs. Minnie Hardy is assisting in the new hospital wards this week, as the nurse who was expected to arrive last week, is held up at Albuquerque on account of the strike.

Mrs. George Sargeant returned from a trip east Sunday evening. Mrs. Sargeant was held at Seligman on account of the strike and made the trip in by motor.

C. W. Herndon, A. H. Hawkins and Charlie Bossert left for Los Angeles Saturday afternoon. Owing to the rail strike the party had to make the trip overland.

The regular Saturday night dance will be held at Odd Fellows Hall. The El Paso Jazz Orchestra who played here a month ago, arrived in Kingman today, and will play for the dance.

A delegation of Chloride people were at the meeting of the board of supervisors Tuesday. Among those present were W. P. Epperson, J. P. Barksdale and wife, J. B. Frye and wife and Mrs. Virgin.

W. P. Carr and wife, and W. P. Carr, Jr. and wife were up from Cedar a few days ago. The gentlemen are operating their mines in the Cedar section and are getting out exceptionally good ore.

The Miner in a previous issue made a sad mistake and inasmuch as this mistake had to do with a young lady's age we apologize. Little Miss Devine was quoted as being 1 year and 4 months old—she is but four months old.

Mr. and Mrs. Ross Blakely returned yesterday from their trip to Oak Creek. Mr. and Mrs. S. D. Stewart and family and Mr. and Mrs. Melvin George went on to the Grand Canyon for a day or so and will return here today or tomorrow.

Miss Mary Lou Raines, of Hickory, Mississippi, has wired her sister Mrs. E. Ross Housholder that she is leaving for Kingman in a few days. She will make her home with her sister here this coming year. Miss Raines is a talented musician and will start classes in piano here the first of September.

Black & Ellis local dealers for the Maxwell and Chalmers report the sale of three Maxwell cars and one Chalmers for the week. Also they report the sale of the following used cars: A Ford to Earl Horner, a Ford to Fred Wheeler, a Dodge to Arthur Starr, a Chalmers to Wm. Tanblin, a Ford to Juan Mendosa and an Oakland to Jose Gonzales.

Miss Katherine Lorig was over from Chloride Tuesday last attending to important business affairs. She reports that a force of men are now at work on the old Jumbo claim, in the Minnesota district and that considerable development is contemplated. The principal men of the operating company are expected in Kingman in a few days and will make a visit to the mines. S. D. Myers is superintending the work and is sure to get good results. The property is a most inviting one.

The Old Fashioned dance held at Odd Fellows Hall Saturday night was attended by a large crowd. The young folks as well as the older ones, enjoyed the old fashioned dances. The music was furnished by the Waters' Orchestra and it may be safely said the early day orchestra had nothing on this one, as Mrs. Waters had carefully selected the music for the pleasure of both young and old. By request, Mr. Chas. Inus and Mrs. Re played for the square dance. All who attended voted it one of the best given in Kingman, and already requests are being made for another one, which will be given in the near future.

Last Tuesday a large delegation of Chloride people appeared before the board of supervisors for the purpose of securing funds to make possible the employment of a teacher for eighth, ninth and tenth grade work. There are eight children who have been graduated into the high school work and these would be benefited by the employment of a high school teacher. It is possible that some arrangement will be made to take care of these children at both Oatman and Chloride for this year and in future some means will be developed for the establishment of a dormitory at Kingman and the children brought in here to take the high school course.

FAREWELL DANCE WEDNESDAY NIGHT

On Wednesday, August 23rd, there will be a farewell dance in honor of the following young people of Kingman who leave the last of the week for various places to take up their studies for the following year. The public is invited, especially the friends and parents of these young people.

The following are the names in whose honor this dance will be given: The Misses Edith and Mabel Carrow, Helen Chambers, Leona Foster, Eliza Lovin, Dorothy George and Ruth Long of Oatman, Messrs. Howard Hoffman, Toler White, Andrew Devine and Frederick Rivers.

ANOTHER CLEAN-UP FROM THE ORPHAN

Wednesday last Olson and Van Dover made a cleanup of their mill at Secret Pass, the result being a big chunk of amalgam, the value of which has not been ascertained. The men have been breaking down the ore in a glory hole and tramping the ore to the mill through a tunnel. This ore will average above \$15 per ton. It is proposed that the shaft to the east of the main workings be equipped and the ore in that part of the mine be milled. This ore is high grade, as says as high as \$78 having been obtained from the shaft. A drift has been driven across 25 feet of ore from the bottom of this shaft, but owing to lack of equipment the ore was stowed in the drifts and will have to be hoisted to the surface before further work is carried on there. This ore is said to be the best in the mine, having an average value above \$20 for the whole width. At this point the vein is fully 60 feet wide.

Secret Pass is one of the most ideal places in the San Francisco district for mine operation, being easily accessible, roads having been carried into the various mines. While these roads are not exceptionally good it would require little work to make them boulevards. The gradients through the mountain passes are low and the washes wide, so that the present roads could readily follow the low places without the necessity of much roadwork. The whole country is gridironed with mineral veins, many of which are large and extensive.

The first cost is the last. We repair Dayton Tires and Tubes free. Black & Ellis. (Adv.)

TWO BABY GIRLS AT HOSPITAL

The new County Hospital had its first new arrival Tuesday evening when the Sterk paid its first official visit.

He left an 8½ pound girl to Mr. and Mrs. Max Anderson and two hours later our friend returned and left an 8½ pound girl for Mr. and Mrs. Byron Duncan.

WARD HONORED BY COLORADO DEMOCRATS

The following article taken from the report covering the State Democratic Convention at Denver, Colorado, appeared in the Rocky Mountain News of Denver, Colorado, Tuesday, August 1st, 1922.

Olney Newell of Denver, introduced a special resolution to be forwarded to Honorable Chas. B. Ward, formerly of Boulder, a state senator, former Democratic Chairman, and one of the most popular Democrats in the State, who moved to Arizona twelve years ago and is now a candidate for Governor. The resolution follows:

"Resolved that the Democrats of Colorado in state assembly convened send greetings to Honorable Chas. B. Ward and the Democrats of Arizona and express their great satisfaction that he has been designated to lead the Democracy of the state in this campaign. Loved and honored by the Democracy of Colorado, he is entitled to the confidence and support of all citizens of his adopted state who would have as their chief executive a Jeffersonian Democrat and honest man."

This expression from the Democrats of Colorado can leave no doubt as to the character and ability of Mr. Ward, and the esteem and respect which the people of Colorado have for him.

CANDLES IN THE ARCTIC CIRCLE

Dr. Moss, of the English Polar expedition of 1875-77, among many other things, tells of the strange effects of extreme cold upon candles they burned. The temperature was from 35 to 50 degrees below zero, and the doctor says he was considerably discouraged when upon looking at the candle he discovered that the flame could not melt all of the tallow of the candle, but was forced to eat its way down, leaving a sort of skeleton candle standing. There was heat enough, however, to melt odd shaped holes in the thin walls of tallow, the result being a beautiful lacelike cylinder of white with a narrow tongue of yellow flame burning on the inside and sending out many streaks of light into the darkness.

NEWS FROM CHLORIDE

Mrs. L. G. Williams left today to join her husband in Randsberg, Cal.

D. H. Burhard has returned from Oatman, where he has been for the past several weeks. He says it seems cool here in comparison.

A. B. Richmond arrived in town yesterday. Mr. Richmond is making a deal on one of the properties controlled by W. H. Hall, and, we understand, he expects to do some work in the near future.

One of the parties interested in the Red Gap told us recently that we might safely look for some big work to be done there this fall and winter.

A great many of the Chloride folks have been going over to Kingman lately to try to get some reasonable solution on school questions. A number of children here are ready for ninth and tenth grade work, but owing to a lack of dormitory and other facilities, because of heavy expense, as things now are, even if accommodations could be found for pupils, and there being no adequate means of transportation back and forth, it would seem that some way should be found to give ninth and tenth grade pupils this work at the home schools until such time as Kingman shall be in shape to provide the necessary facilities for outside pupils. Word having come that Oatman is making arrangements to give its children this work at home, Chloride parents at once stirred themselves to try and discover how they were going to manage it and see if it were not possible to obtain the same advantages for this district.

Where there is a will there is always a way to accomplish good things and, if the good people of the county will get together with the officials and only ask for justice—what is fair and right—in the interests of education, we believe the officials, having the education of our children at heart, will find some way to extend the facilities desired so that no child in the county, who desires to take the work, will have to go without it.

Sam Rhea is making a shipment of ore from his property, but, on account of the strike, the car will remain here a week longer than was expected. Jess Acord has gone to Osidick, Cal. Frank Hodge is back again, having gone to Kingman with a very bad hand. He says the hand is getting all right again.

Wireless telephone operation across the English Channel has made possible continuous communications between English shore stations and flying planes in the Brussels-Paris service, and is particularly helpful in heavy fogs, as orders or explanations of conditions at landing fields can be conveyed to pilots of aircraft.

BULLETINS ARE APPRECIATED

At an expense running into considerable money the Miner has kept its readers advised of the strike situation the past week. Though much of the news in general is not very satisfactory, what we have been able to get has been much appreciated apparently judging from statements volunteered by some of our readers, especially so for the days when we were not able to get any papers whatsoever.

As the papers are coming more regularly now we will soon discontinue the bulletin service. We have been glad to serve you in this respect.

WHEN LIGHTNING HITS THE SAND

When a bolt of lightning strikes a bed of sand it plunges downward for a distance in accordance with its dimensions and intensity, transforming the silica in the sand into glass and forming a tube of greater or lesser dimensions. The same action is also observable when a lightning bolt strikes a rock mass, the silica on the faces or cleavage of the rock being reduced to glassy consistence. In the sand mass the tubes of glass break up and form the brilliant substances usually found in the washes throughout the southwest interassociated with the labradorites. Some of the tubes that have been formed by the intense heat of the lightning flash are from the size of a lead pencil to three or four inches in diameter. Many are quite brilliant and may be cut into semi gem stones. The greatest variety of these brilliants are found on Little Arrarat, in Armenia, where they are cut and sold to visitors as gems. Some of these rocks are soft and porous and the cavities are filled with the glass, which usually is of the bottle green variety and sparklingly beautiful.

CHURCH NOTICES

CHRISTIAN SCIENCE SOCIETY

Branch of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

Sunday morning at 11 o'clock. Subject, "Mind". Sunday School at 9:45 a. m. Wednesday evening Testimony at 7:30. Chapel on Spring St.

ST. MARY'S CATHOLIC CHURCH

Sunday, August 20th Mass will be said at 7:30 A. M. Benediction after Mass. FR. HOOTSMANS.

ST. ANTHONY'S CHURCH

Oatman, Arizona Mass will be said at 10:30 A. M. FR. HOOTSMANS.

TRINITY EPISCOPAL MISSION

Rev. H. H. Gillies, Rector Sunday, August 20th 7:45 P. M. Evening Service and Sermon. You are cordially invited to all of our services. Books from the library may be obtained after any service.

LIKES GOLD CHAIN

E. A. Junior, retired fruit grower of Sacramento, visited the Gold Chain property this week in company with F. E. Haley, president of the company. Mr. Junior who is a stockholder in the company said in a wire to some of his friends in Sacramento: "Found Gold Chain as Mr. Haley represented. Anyone wanting more gold than is in this mine is a hog."
